CIRCULAR DECEMBER 2025

CLASSES - I & II

"AI is the bridge between imagination and reality, turning dreams into possibilities."

Dear All,

AI stands for "**Artificial Intelligence.**" It is a technology that gives computers the ability to think, learn, and act like humans. The idea of **AI first emerged** in the **1950s**, when computer scientists began to think about giving machines the ability to think and learn like humans. Many scientists and computer experts have contributed to the development of AI. Some prominent names include:- **Alan Turing, John McArthur, Marvin Minsky.** AI works using techniques like machine learning and deep learning. It learns from large data sets and makes predictions or decisions. AI is being used in many fields, such as:- Healthcare, Finance, Education, Transportation, Entertainment. The future of AI is very bright. It will help make our lives even easier and more convenient.

- **Narrow AI/Weak AI:** It is designed for a specific task, such as making recommendations, recognizing faces, or translating languages. Examples: Siri, Alexa.
- **General AI/Strong AI:** It can perform any intellectual task that an intelligent human can.
- **Super Intelligent AI:** It surpasses even human intelligence and can outperform humans in all areas.
- **Limited Memory:** It learns from past experiences and uses them in future decisions. Example: Self-driving cars.
- Some example of AI include virtual assistance like Siri- for I-phone, Alexa, Self driving car, images and speech recognizer, Google Gemini, Chat GPT.
- **Sophia:** The first robot citizen with AI, capable of interacting with people and looks like a lady was created by Saudi Arabia.
